34th ANNUAL BULL & FEMALE SALE
FEBRUARY 17, 2024
SATURDAY AT 11:00 A.M. (EST)
Ridge Spring, South Carolina

YON FAMILY FARMS

FAMILY • COMMITMENT • VALUE

34th ANNUAL
Spring Sale

SCHEDULE OF EVENTS

FRIDAY, FEBRUARY 16, 2024

CATTLE AVAILABLE FOR INSPECTION FROM NOON UNTIL DARK.

7 p.m. - BBQ supper available at the farm

SATURDAY, FEBRUARY 17, 2024

CATTLE AVAILABLE FOR INSPECTION ALL MORNING

10:30 a.m. - 1:00 p.m. - Chili lunch available

11:00 a.m. - Cattle auction beginning with bulls.

The Sale starts at 11:00 a.m.

Selling 165 Long Yearling Bulls

Selling 100 Females proven donors, fall pairs, bred cows & bred heifers.

Bulls will sell first, followed by the females, in catalog order.

LOAD OUT BEGINS AT THE END OF THE BULL SALE

Spring 2024

SALE INFORMATION

AUCTIONEERS

Eddie Burks, Park City, KY (270) 991-6398
Dave Mullins, Danville, IN (317) 503-2798

DELIVERY

We offer free delivery on bulls in SC, NC, GA, and FL provided the buyer is able to make arrangements to receive bull when delivery is made to your area, usually within a few weeks of the sale. Due to fuel costs and time restraints, we must consolidate trips. If you are unable to receive bulls when delivery is scheduled to your area, you will need to make arrangements to pick up your bull at the farm. Commercial delivery is free anywhere in the continental U.S. with a \$6,000 or more purchase and can be arranged by the Yons. If you pick up your bull at the farm, deduct \$75 off the purchase price. Although we don't offer free delivery on females, we will be glad to help make arrangements for delivery.

Each animal will be at purchaser's own risk as soon as sold. Bulls and females will be fed and cared for free of charge for 2 weeks following the sale and will be housed at a rate of \$3.00 per day thereafter until you are ready to pick up your purchase. Insurance will be available for cattle on sale day.

GUARANTEES

All cattle sell satisfaction guaranteed. For one year following the date of sale, if a buyer is not satisfied for any legitimate reason, he is entitled to a credit, refund or replacement, provided the animal has been properly cared for.

EPDs

EPDs current as of December 29, 2023. Updated EPDs can be viewed online at www.angus.org.
References: American Angus Association®, AHIR®, AngusSource®, CAB®, Pathfinder®.

HERD HEALTH

Routine herd health and vaccinations up-to-date. John's testing for over 23 years (JPL4). Bulls are tested negative for PI-BVD. Complete Breeding Soundness Exams on all bulls.

RETAINED INTEREST & ANNOUNCEMENTS

Yon Family Farms reserves the right to retain a one-third semen revenue interest on any bull sold in the sale. Those bulls which Yons wish to retain an interest in will be announced from the sale block on sale day and will be posted on sale update sheets available online by the Thursday preceding the sale. The new owner will have full possession of the bull - this is only a semen interest if the bull is collected. Announcements made on sale day take precedence over sale book information.

TERMS AND CONDITIONS/GENETIC DEFECTS

Cattle will sell under the suggested Terms and Conditions of the American Angus Association (http://www.angus.org/Pub/suggested_sale_terms.pdf). All cattle sold are free of known genetic defects unless indicated with DDC.

FOOD

Friday, February 16th BBQ Dinner at 7:00 p.m.

Saturday, February 17th Complimentary lunch from 10:30 a.m. until 1:00 p.m.

DIRECTIONS

Farm located at 318 SC Hwy. 392 (Aiken Road) in Ridge Spring. Watch for YFF Signs
From Augusta, GA - Take I-20 East to Hwy. 1 to SC Hwy. 392 in Ridge Spring, SC.
From Columbia, SC - Take I-20 West to Hwy. 39 to SC Hwy. 392 in Ridge Spring, SC.
From Saluda, SC - Follow Hwy. 39 to SC Hwy. 392 in Ridge Spring, SC.

*See page 4 for more information about online bidding and the conference line.

Welcome to the 34th Annual Spring Sale!

Thanks for taking time to take a look at our offering. We hope you can be with us on sale day, and if not in person, check the sale out on DVAuction.com. Bulls will sell first and we will follow with a high quality offering of females, bred heifers and cows, as well as a large group of fall cow/calf pairs. The offering incorporates donor cows that have been successfully flushed at YFF and a collection of young productive females. If you don't know us, below are a few bullet points that will tell you about our program.

*Since beginning in the cattle business in 1989 as first generation Angus breeders, our income has always been derived from the cattle business with Angus cattle being the bread and butter of our livelihood.

*We are a family operation, with all three of our young adult children fully involved after graduating with agricultural degrees from our state land-grant university, Clemson. There are also twelve other fully committed team members who contribute their talents to the farm on a daily basis as well as student interns.

*YFF is really a grass and forage farm and the cattle are our harvesters.

*We believe good feet, sound udders, and acceptable dispositions are just as important as superior EPDs.

*We don't trim feet. The bottom end of the bull calf crop become steers here and no bulls are sold prior to auction day from within a contemporary group. They have not been picked over.

*All animals in the sale have been genomic tested which improves the accuracy of genetic predictions and confirms parentage. Bulls are also freeze branded for easy identification.

*Take note of the average EPDs of the bulls in this offering on page 6. The AVERAGE EPDs of our group ranks in the top 25% of all non-parent Angus bulls for WW, YW, HP, MB, \$M, \$W, \$G, \$B, and \$C. We are really pleased the bulls we sell offer a truly balanced EPD profile. 82% of our offering also meets the criteria used to target bulls who will sire calves likely to meet the CAB® brand.

*Customer service is important to us and your satisfaction is guaranteed. While this is not a life insurance policy, we always try to live by the Golden Rule and will do our best to keep your business as a repeat customer.

*Bull delivery is always free in FL, GA, the Carolinas, and anywhere in the continental US with a \$6000 purchase. Unfortunately we cannot safely offer delivery on females/calves with a trailer full of bulls. We will be glad to help make arrangements for delivery.

*You will find many of the cattle in the offering sired by "Yon" bulls, both AI and natural service. We believe it is important to use the bulls we produce to insure their calves can compete in groups of calves sired by well-respected AI bulls. Yon genetics are adaptable to many geographical areas and actually seem to thrive in the hot, humid conditions of the Southeast, including areas that rely on fescue.

*If you can't attend on sale day, you can bid via the internet, telephone or with absentee bids. We will work with you however you wish to get you the cattle you need.

Again, thanks for your interest in what we do and if we can be of any help to you, feel free to contact any of us.

CATTLE WILL SELL IN SALE BOOK ORDER

How to purchase cattle at the auction if you cannot attend...

At Yon Family Farms, we want all of our customers to bid with confidence. If you are unable to attend the auction we have several ways to assist you. Customer satisfaction is of the utmost importance to us. We will be glad assist you with selection, bidding, and purchase of your livestock, all insured by our **SIGHT UNSEEN GUARANTEE**.

OPTION 1 ONLINE BIDDING

DVAuction

Visit www.dvauction.com and register!

It's as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "create new account" tab
2. Apply for bidding by clicking "apply for bidding" in the upper left corner of your screen, at least 24 hours prior to the auction
3. Tune into the sale and make your purchase!

** Users can bid from a phone or tablet. They will need to be logged into their account and use the corresponding browser that comes with their phone.*

For Apple products, they will want to use Safari and Android/Samsung users will use Chrome. They will also want to make sure their phone/tablet is completely up-to-date.

OPTION 2 CONFERENCE LINE

Conference Line 1 (803) 685-5139
Conference ID 7492614

- Contact Lydia Yon by Thursday, February 15th to register for a "phone buyer number" and provide bank references.
- On sale day, during the sale, registered bidders will call 1 (803) 685-5139 and enter the passcode of 7492614 followed by the # sign.
- You will then be connected to a conference call along with all registered phone bidders.
- The call will be led by Wes Weeks, who will relay the auction information over the phone.

OPTION 3 ABSENTEE BIDDING ON YOUR BEHALF

If you cannot attend the sale, and prefer not to bid online or on the phone, we will be glad to personally help with your order. Call the Yons prior to February 17th (if at all possible) and give us your parameters and your price range. Your bid will be handled confidentially and professionally, spending your money as if it were our own. We are happy to assist with cattle selection prior to sale day and are willing to show you cattle by appointment anytime.

All Sight Unseen Purchases are GUARANTEED!

HOW TO READ & USE THE DATA...

An Expected Progeny Difference (EPD) is a prediction of how future progeny of a sire or dam are expected to perform in various production and carcass traits which are measurable. EPDs are expressed in actual pounds, square inches, or centimeters (depending on the trait), plus or minus what you can expect in the weights or measurements of progeny sired by a particular animal as compared with another animal. The EPDs of the animals listed in this sale book can be compared to other animals of the same breed.

EPDs are breed specific. Don't compare EPDs between Angus, Ultrablack and SimAngus™.

The CAB® icon will appear on the pedigree of those bulls that meet the criteria for targeting the Certified Angus Beef® Brand. Only 1 in 4 non-parent bulls in the Angus breed qualify.

82% of this offering qualifies for CAB®!

IBBA All Animals Non-Parent Average EPDs and Indexes

CED	BW	WW	YW	Milk	CEM	SC	MARB	US RE	FERT	TI											
+4.87	50%	+4.8	50%	+23.7	50%	+45.45	50%	+8.34	50%	+3.55	50%	+5.9	50%	+1.01	50%	+2.31	50%	+2.32	50%	+2.13	50%

Calving Ease Direct (CED) - is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW) - predicts the difference in average birth weight of a bull's calves compared to calves of another bull. Reported in pounds. *Experience has shown that an Angus bull with a CED EPD of +8 or higher and a BW EPD of +1.5 or less can be used on first-calf heifers with a minimal number of calving problems. If you do not have heifers to breed and just need a bull for cows that have calved before, most Angus bulls are acceptable for use on mature cows from a birth weight standpoint.

Weaning Weight EPD (WW) - is a prediction of a bull's ability to transmit weaning growth to his progeny. For example, Bull A has a Weaning Weight EPD of +80 pounds and Bull B has a Weaning Weight EPD of +60 pounds. At weaning, Bull A's calves will average 20 pounds heavier. A higher number is desirable.

Yearling Weight EPD (YW) - takes into account both pre-weaning and post weaning growth. Yearling weight is the most heritable of all growth traits. You can expect bulls with high Yearling EPDs to produce fast gaining calves. If Bull A has a Yearling EPD of +110 and Bull B has a Yearling EPD of +80, Bull A's calves will average 30 pounds heavier than Bull B's at one year of age.

Residual Average Daily Gain EPD (RADG) - expressed in pounds per day, is a predictor of a sire's genetic ability for post-weaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Scrotal Circumference EPD (SC) - expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires. Heifer Pregnancy (HP) is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction..

Docility (Doc) - is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

Calving Ease Maternal (CEM) - is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Milk EPD - Expressed in pounds of weaning weight that result from the amount of milk produced by daughters of a particular bull, as compared to the daughters of other bulls. If Bull A is +30 for Milk and Bull B is +20, bull A's daughters' calves will weigh 10 pounds heavier at weaning due to her superior milking ability.

PERFORMANCE DATA

Claw	Angle	Act BW	Adj 205	Adj 365	Adj 365 SC	Adj 365 %IMF	Adj 365 RE		
+0.34	5%	+0.28	5%	70	772	1322	33.88	5.49	18.6

Foot Claw Set EPD (Claw) - Expressed in units of claw-set score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal claw set. The ideal target for claw set being toes are symmetrical, evenly and appropriately spaced.

Foot Angle EPD (Angle) - Expressed in units of foot-angle score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal foot angle. The ideal targeting animals with a 45-degree angle at the pastern joint with appropriate length and heel depth.

Hair Shed EPD (HS) - a lower EPD is more favorable indicating a sire should produce progeny who shed their winter coat earlier in the spring. Selection for this trait should improve the genetic potential for a sire's progeny to shed off earlier increasing the environmental adaptability of cattle living in heat stressed areas and producers grazing endophyte-infected (hot) fescue.

Heifer Pregnancy EPD (HP) - is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

CARCASS DATA

Carcass Weight EPD (CW) - expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb) - predicts the difference in average USDA marbling score of a bull's progeny compared to progeny of another bull at a similar end point. The higher the value, the higher the amount of intramuscular fat (taste fat) in the ribeye, which positively affects quality grade.

Ribeye Area EPD (RE) - expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

PERFORMANCE INFORMATION

YEARLING BULL DATA AVAILABLE ON REQUEST AND ON OUR WEBSITE OCTOBER 1.

ADJ 205 - Weaning weights adjusted to 205 days of age and for age of dam. Our calves are not creep fed and were weaned on forages with no grain. (Quality of recipient dams will affect weights of ET calves.)

ADJ 365 - Weight, scrotal circumference adjusted to 365 days of age.

%IMF - The amount of desirable fat or marbling in the ribeye muscle adjusted to 365 days of age.

ADJ Ribeye - Measured in square inches and adjusted to 365 days of age. Most heritable of all carcass traits.

PERCENTILE RANKINGS for EPDs and \$Indexes allow you to see how the cattle in the sale offering stack up to any Angus (SimHybrid or Brangus Influenced) bull/female within their respective breed, not just those in our sale group.

American Angus Association \$Value Indexes

Dollar value indexes, or **\$Values**, are a tool used to select for several traits at once based on a specific breeding objective. An economic index approach takes into account genetic and economic values as well as the relationships between traits to select for profit.

Maternal Weaned Calf Value (\$M), an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. \$M is built off of a self-replacing herd model where commercial cattlemen replace 25% of their breeding females in the first generation and 20% in subsequent generations. Remaining cull females and all male progeny are sold as feeder calves. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), an index expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. \$W assumes that producers retain 20% of their female progeny for replacements and sell the rest of their cull female and male progeny as feeder calves. Over time, increased selection pressure on \$W will increase weaning and maternal milk traits while also continuing to increase mature cow size.

Feedlot Value (\$F), an index expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

Grid Value (\$G), an index expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), an index expressed in dollars per carcass, facilitates simultaneous multi-trait genetic selection for feedlot and carcass merit. \$B represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a quality-based carcass grid.

Combined Value (\$C), an index expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid.

What do the LOGOS mean?

The cattle in this sale offering have all been DNA tested. Each lot will display a symbol for DNA testing on their pedigree. Those animals' EPDs are GE-EPDs, meaning they have had a genomic test performed on a DNA sample from that animal, which provided additional information used in the calculation of their EPDs.

American Angus Association Genomic Enhanced EPDs

- There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).
- GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association®, home to the largest and ever-growing single-breed beef cattle database.
- EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:
 - Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs
 - Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)
 - The ability to make more rapid progress for traits that are important to you, due to:
 - > more accurate selection
 - >> easier identification of genetic outliers
 - >>> the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 9-35 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

PEDIGREE + PERFORMANCE + PROGENY + GENOMIC TEST RESULT = GE-EPD

* It is important to note that genomics do not completely describe the variation in the traits of interest. Actual measurements collected by Angus breeders, such as birth, weaning, and yearling weights, ultrasound scan data, etc., continue to be an important part in further development of improved genomic panels, not to mention an important component in EPD calculation.

When making selection decisions for traits that have EPDs provided by the AAA, then the EPDs should be the selection tool of choice. The EPD and accuracy account for all sources of information available on the animal - pedigree, own record, weights/measures, and genomic results. Genomic test results include parentage testing, which helps pedigree accuracy.

A word about the Bulls...

82% of the YFF Bulls qualify for Targeting the Brand

89% of the YFF Sale bulls rank in the top 35% for \$M

77% of the YFF Sale bulls rank in the top 35% for \$B

92% of the YFF Sale Bulls rank in the top 35% for \$C

17 bulls in the sale offering rank in the top 10% for \$M, \$G, \$B, and \$C - ALL FOUR

The Long Yearling Bulls (Fall born)

The bulls were weaned, (with no creep) and preconditioned. These bulls were fence line weaned on grass and continued to limit graze, post-weaning for several weeks. Late summer they were started on a high roughage ration consisting largely of corn and sorghum silage, wheat/oat/triticale/rye grass baleage, Bermuda hay, hominy, and corn gluten feed.

How the bulls are handled...

1. Bulls were vaccinated at 3-4 months of age for BVD, BRSV, IBR, PI3, Pasturella, and Clostridial disease. At weaning, bulls were given a booster for the same.
2. Bulls were not creep fed at any point and were weaned on forages with no grain. After a short adjustment period following weaning, they all began test. ET bulls are so noted in the sale book and were raised on recipient dams.
3. YFF has been Johne's testing for over 23 years (JPL4). Bulls were tested negative for PI-BVD.
4. Bulls were scanned for ultrasound measurements by Andy Meadows, DVM, a B.I.F. and AAA Cup Certified technician from Springwood Livestock Management Systems in Wytheville, VA. Bulls were dewormed and received vaccines for BVD, BRSV, IBR, PI3, Pasturella, and Clostridials. They were also given an Endovac injection.
5. Bulls were given a complete breeding soundness exam by Dr. Jeff Nordin and Dr. Joel Riley, from Saluda, SC, in January or February 2024. Bulls were vaccinated for Leptospirosis, Vibriosis, and given an Endovac booster.

A word about the Females...

The females are straight from the heart of our herd. Many of the females in this offering, are the dams of top selling bulls in our sales. We want our customers to be successful and profitable with the females they purchase from us and believe these are the right kind of females to make this happen.

Breeding Information We will continue to keep breeding details posted on our website.

Delivery of Females We do not offer free delivery of females but will gladly assist with trucking arrangements.

FREQUENTLY ASKED QUESTIONS

Do you ever lease bulls? We are not able to lease bulls for use due to herd health considerations.

How soon will my bull be delivered? We group bulls together by common geographical area and prioritize delivery, based on who needs their bulls the quickest. If for some reason you cannot accept your bulls when delivery is scheduled in your area, you will need to make arrangements to pick up here at the farm. It is extremely important when you check out that you give a date you need the bull by to help us schedule delivery appropriately. We also need your physical address and cell phone numbers. We attempt to have all deliveries made within a few weeks of the sale.

Why don't you offer delivery of females? We will make every attempt to help you with arrangements for delivery of your females. However, it is often not possible to safely transport any females with the bull deliveries, due to limited compartments in the trailer and the concerns of transporting pregnant females or small calves.

If I have a problem with my purchase, what happens? Unfortunately, with animals, there are bound to be unexpected issues. Rest assured that we sell all animals "satisfaction guaranteed" and that if you are not satisfied for any legitimate reason for one year following the sale, you will be due a credit, refund, or replacement, provided the animal has been properly cared for. However, this is not a life insurance policy and we cannot guarantee against injury, lightning strikes, calving trouble, or calf mortality. It is our pledge to try to keep you as a satisfied customer and we will work with you to come to an acceptable resolution should any problem arise.

MAKE YOUR CATTLE STAND OUT

You've made a significant investment in your genetics, but does the market recognize that? Stand out by differentiating your cattle with AngusLink™ programs: AngusVerified™ and the Genetic Merit Scorecard™. AngusVerified validates your calves are sired by registered Angus bulls and make your cattle stand apart from other black hides on sale day. The Genetic Merit Scorecard gives buyers the confidence they need to pay more for your quality calves.

Users of the AngusLink programs earn **\$13-15/CWT PREMIUMS** on average. Give us a call, and learn how to claim your competitive edge with AngusLink value-added programs.

The Genetic Merit Scorecard and AngusVerified are administered by IMI Global.

FREQUENTLY ASKED QUESTIONS

I can't come to the sale, but I need a bull. Will you have some for sale after the auction?

The two auctions we hold in October and February are the time to purchase bulls from us. These bulls are not picked over and the entire contemporary group that meets sale criteria is offered for sale, with none from the group being sold prior to auction day. There MAY be a few bulls offered privately between sales that were unable to sell in the auction for various reasons, but the selection and offering is limited. If you cannot attend the sale, we offer telephone, internet, and absentee bidding. Just give us a call before sale day and we will be glad to help work out the best way for you to get the bull you need.

Are the bulls Trich tested? PI BVD Tested? Fertility tested?

All bulls selling are virgin bulls. Bulls over the age of 18 months on sale day, will be Trichomoniasis (PCR and culture) two weeks prior to sale day. For states with different requirements, younger bulls can be tested prior to shipment. Bulls have tested for persistent BVD, and will pass a complete breeding soundness exam before sale. South Carolina is a TB and Brucellosis Free State, and we participate in the voluntary SC Johnes Disease control program, achieving the highest level possible in SC (JPL4).

Yon Feeder Calf Assistance

At YFF, we realize our existence is dependent on our commercial customer's success.

When a commercial producer is willing to invest in excellent genetics and participate in value-added programs, his calf crop becomes more valuable and he should be rewarded. **Simply put**, if our buyers are willing to execute a bullet-proof calf health program and invest their hard earned dollars in our breeding program, we are willing to invest a segment of our time to help them market their calves. We make every attempt to network with buyers who are actively seeking cattle with documented performance in the feedyard and on the rail.

We look at the sale of your calves as your reward for hard work and investment. We encourage you to notify us when your calves are ready to sell, through whatever outlet you prefer, and we will notify potential buyers as we continue to work with feeders and packers that seek out YFF feeder calves.

Using API and TI as a Selection Tool

API - All-Purpose Index Expressed in net dollars returned per cow exposed, evaluates Simmental sires being used on the entire cowherd (bred to both Angus first-calf heifers and mature cows) with a portion of the daughters retained for breeding and the steers and remaining heifers fed and sold on a carcass grade and yield basis. With the exception of shear force (tenderness), all EPDs are considered in this index.

TI - Terminal Index Expressed in net dollars returned per cow exposed, evaluates the merit of sires when bred to mature Angus cows and all progeny are fed and sold on a carcass grade and yield basis. Consequently, maternal traits such as milk, stayability and MCE are not considered in this index.

- First, determine which index to use; if you are keeping replacements use API, if not, use TI. Then, just as with EPDs, zero in on the unit difference between bulls. The difference can be used to determine how much a bull is worth compared to another. Put another way, how much you can pay for one bull compared to another.
- For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 head x 4 yr. = \$6,000).
- A percentile ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed.

Current Sim Hybrid Averages API index is +131.44 and TI is +79.98

WHAT IS AN ULTRABLACK® & WHY WOULD I USE THIS BREED?

Ultrablack® cattle were first recognized in March of 2013. They are the product of breeding a registered Brangus to a registered Angus. To be recognized by the International Brangus breeders Association (IBBA) as an Ultrablack®, the animal must have between 50 and 87.5 percent Brangus genetics and the remaining percentage must be of registered Angus lineage.

Ultrablack® cattle have less ear and cleaner underlines but still possess the hardiness and sustainability of Brahman cattle. The benefits of Ultrablack® cattle make them increasingly popular among cattlemen. Producers typically seek Ultrablack®s for three reasons: (1) They need more pounds at payday. (2) Their cattle have become too hairy, in turn they are losing performance in terms of weight and fertility and are seeking something that will shed off. (3) They are looking to add to the maternal base of their cow herd.

For both Registered Brangus and Angus producers, it allows the opportunity to add new genetics that complement their existing genetic base to produce Ultrablack®s.

Leading off the Angus Female DIVISION

ANGUS FALL PAIRS

YON SARAH D91 / Dam of Lot 166 & maternal grandam of Lot 166A

Lot 166 - Seize the opportunity to own a cow PROVEN to make dollars. Her first flush at YFF yielded 16 calves sired by Yon Top Cut G730. Nine of those sold were offered for sale in 2023 netting an average price of \$8555. Do the math. Her dam and granddam were also proven foundation donors. H344 is a maternal sister to the Yon Chattooga H373 herd bull owned with Five Circle Farm, who sold for \$20,000 in the Spring 2021 sale. H344 has rock solid EPD's across the board and has 12 bull calves with ultrasound scan data, with an average IMF ratio of 105 and an average Ribeye ratio of 102. Top 1% on \$M with a top 10% \$C index.

Current AI Service information available on the YFF website.

Lot 166A - BW 71 lbs. A daughter by the Select Sires bull, Yon Saluda, M706, ranks in the top 5% or better for weaning and yearling growth. A maternal sister to M706 was selected by Baldrige Angus in NE on a summer herd visit and her maternal brothers by Top Cut were standouts in the Fall Maternal Roots sale in 2023. Look at this heifer as the icing on the cake to a superior donor from the Yon program.

A sound Chattooga daughter whose maternal roots go back to the dam of Yon Future Focus T219, one of the greatest bulls ever produced in this program. Calving ease with solid EPDs for all the good stuff - docility, claw, angle, PAP, HS, and HP, along with a top 2% rank for \$M and a top 4% ranking for \$C.

Current AI Service information available on the YFF website.

DEDICATED. COMMITTED.

WHOLE HERD REPORTING WITH MATERNALPLUS

Raising quality Angus cattle takes **COMMITMENT**. We take that seriously, which is why we are **DEDICATED** to not only improve our genetics, but also prepare for the future of the Angus breed. We believe that commitment starts with MaternalPlus. Contact AGI at 816-383-5100 or agi@angus.org for more information.

YON BURGESS B421 / Dam of Lots 175 & 176

Lot 176 - A full sister to Burgess G477, this 1682 daughter produced a \$7500 yearling bull that sold in Fall of 2022. You will love her look and udder quality along with a top 15% \$M and top 25% \$C combination at work.

Lot 176A - Check this Top Cut heifer out - Top 1% \$M and excellent growth EPDs. BW 80 lbs.

YON BURGESS H343 / Lot 176

Lot 175 - The first of two excellent Payweight 1682 daughters from the long-standing Burgess B421 donor, who has had over 45 calves born at YFF. We find it hard to part with this productive donor and are only doing so as she will leave us with eight flush daughters on the ground. Top 1% of all Angus dams for docility, and top 20% or better for \$M, \$W, \$G, \$B and \$C.

Lot 175A - BW 74 lbs. The first ever heifer calf by the Yon Silverstreet bull that was purchased by Poss Angus from the Fall Maternal Roots Sale in 2023. This heifer has all the bells and whistles with excellent rankings for docility, claw, angle, PAP, HP, and \$M, \$G, \$B and \$C. Top 5% PAP

One of our favorites, this cow has a 357-day calving interval and nursed twins last year, weaning off over 1370 pounds of calf, breeding right back on schedule. The twins don't count toward her published average weaning weight ratio of 116 on her previous calf, but she would have held right at 116 with the two of them figured in. Top 3% or better for weaning and yearling EPD and \$W index.

Donor after donor fill this female's pedigree from the Sarah and Sally cow families. She has weaned 2 natural calves with an average weaning ratio of 105 and her 4 calves with scan data earned an average ratio of 116 for IMF. Four sons have sold through our sale for an average price of \$7500. Her yearling bulls that sold in the Fall earned the honor of selling as the number 3-5 bulls of the entire group. The suite of index rankings she holds are top notch, all top 10% or better. Due to calve to Yon Premium, (the full brother to Yon Saluda and Yon Southern Comfort). Calve this one out and get her in your donor pen. Due to calve 3/27/24 to Yon Premium with a Heifer calf.

If you want to own the only dam in the breed with this combination of top 1% claw and angle, \$M and \$C index, better get your hand in the air for this young cow. She combines all the strengths of the Hazel, Sally and Sarah cow families and has a cool pedigree. Donor prospect - we can all use more pedigrees that read with numbers like J1110. Due to calve 4/8/24 to Yon Premium.

This is a nice young female who weaned her first calf off to earn a ratio of 106. She also reads with a solid set of high-ranking numbers all the way across the page. Take special note that \$M, \$W, \$B, and \$C all are top 2% or higher, and she has a 15 CED EPD, providing the opportunity to mesh well with an abundance of bulls. Due to calve 5/5/24 to Yon Premium.

Owned with Select Sires Inc. No other sire in the Angus breed offers this combination of calving ease, \$M, \$G and \$C. His Dam, Yon Sarah D668 is an anchor of our donor program, consistently producing top performers and top sellers, with excellent eye appeal and soundness. She is one of only 4 dams in the Angus breed with her combination of \$M, \$G, \$B, and \$C. (The other 3 were born in 2020-she is 2015 model - way ahead of her time...) No other bull writes a set of numbers like he does, without sacrificing eye appeal, soundness or functionality.

Owned with Woodhill Farms and Jud & Denise Baldrige Top Seller of the 2023 Spring Sale, this Top Cut son puts together a great combination of CE EPD, SC EPD, \$M and \$C Index. His young dam has done a phenomenal job at YFF, earning a WWR of 112/3 and a YWR of 116/2. Cutting Edge posted a ratio of 145 for IMF in a contemporary group of 43 head. We are anxious to see how his calves stack up in the herd. Semen is available for sale.

Owned with Deer Valley Farms His dam, Yon Sally C200, is a power cow with over 90 progeny at YFF. Yon Sally C200 is the only cow in the Angus breed with this combo of YW EPD, \$M, \$B, and \$C - all ranking in the top 4% or higher of current dams. C200 offspring are easy to look at, powerful and sound, as evidenced by Chattooga E46 and his calves alike.

Owned with Genex Cooperative As stated in the current Genex catalog, H397 is a calving-ease, performance-minded growth bull with a unique combination of \$M, \$B, and \$C. He blends the maternal power of the Yon program, combining the Sally, Hazel and Sarah cow families. His HP, docility, PAP, and hair shed EPDs are a bonus. Use this big-time \$M bull to infuse fertility and docility, while maintaining calving ease and performance. He is the only sire in the breed with this combination of CED, WW, Docility, HP, \$M and \$C.

Owned with Genex Cooperative Following in his sire's footsteps, this is the only sire in the Angus Breed with his EPD package of CE, WW EPD, HP, \$M and \$C. Time tested genetics that will tip the scales. We have used him heavily in our program.

The bulls highlighted on the YFF Herd Sire pages were bred and born in the Yon program and are currently being used for natural and /or AI service at YFF. To make sure we are producing bulls that will get it done, we believe it is important to use bulls developed here and make sure that their calves can compete in groups of calves sired by respected AI sires. The Yon herd bulls' genetics are adaptable to many geographical areas, and actually seem to thrive in the hot, humid conditions of the Southeast, including areas that rely on fescue.

Owned with Knoll Crest Farms & Alta Genetics The record selling bull from the Fall 2022 Yon Sale, Flagship is a massively constructed, good footed, high-capacity bull with an athletic stride. He is big testicled and wide based. No animal in the Angus population comes close to matching his combination of calving ease, growth and marbling, PLUS, he is top 1 or 2 % RADG, CEM, \$G, \$B, and \$C. He will continue to see extensive use in the YFF and Knoll Crest Farms programs and high-quality semen is available for sale.

Owned with Musgrave Angus and Genex Deep Ridge puts together a rock-solid pedigree, EPD package, and a true beef bull phenotype. His dam, Yon Sarah A100, is also the mother of Yon Full Force C398, owned with ABS. Both bulls and females sired by the deceased, Yon Deep Ridge F460, sell in this offering. Limited semen is still available.

Visit our website to view additional Yon herd sires with semen availability & other frozen genetic opportunities.
